# Today: How to post, shade and shadow, upcycling resources

### A few things that are not aesthetics:

- Materials like wood. Just because wood looks nice does not make it an aesthetic by itself. Go further, to style and context.
- A generic sport i.e. cycling. There are all kinds of approaches and styles that change the aesthetic. Be specific.
- Upcycling. An upcycled artifact can embody any number of aesthetics. Think a miminalist array of packing peanuts, or an elaborate faux-Victorian swan made of aluminum foil and cut up cans covered in fleur-de-lis and curlycues.
