

Zotero Library Access

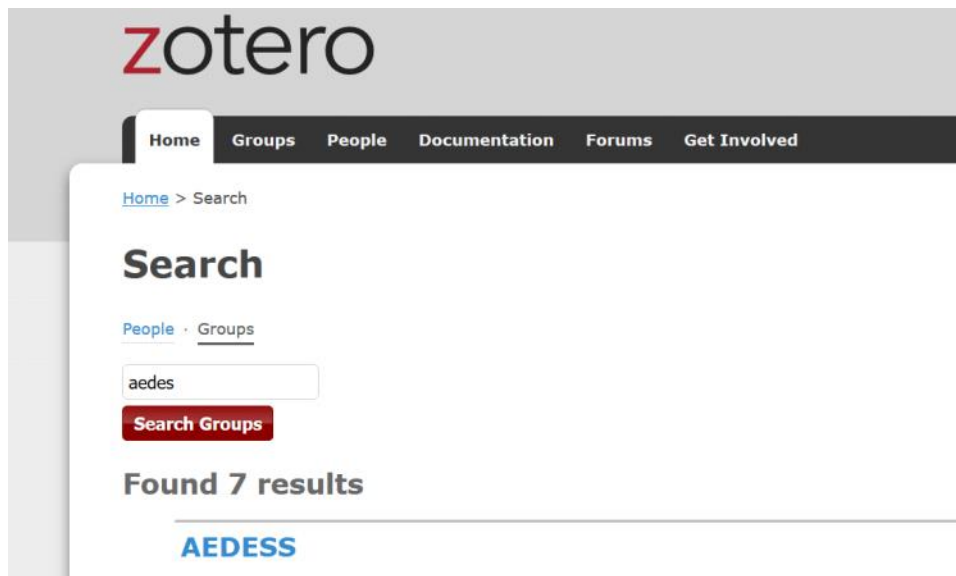

Thursday, January 14, 2021 4:15 PM

Zotero is a citation management tool like Endnote, Mendeley, Bibme, Citation Machine, etc. . Here I'll describe how to get access to our group library "AesDes" where you can find references for the readings for our class as well as other texts, papers and websites on design movements, notable designers, collections of design works and more.

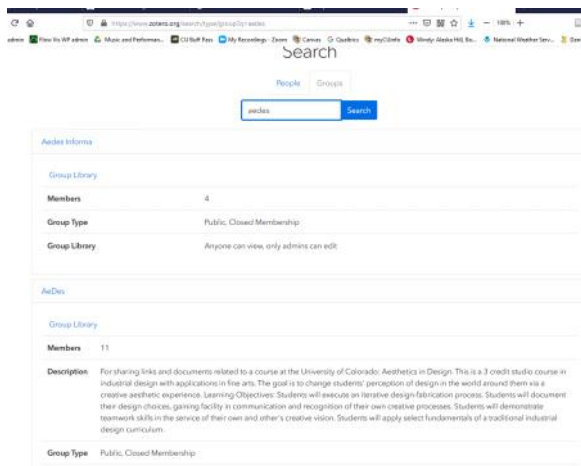

- 1) Use the login button to register for a free account at <https://www.zotero.org/>

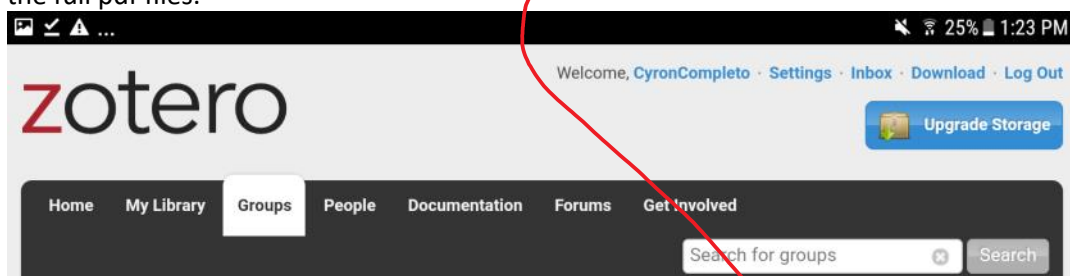

- 2) Activate your account via email.
- 3) You can either
 - a. download the Zotero app plus the Connector for your browser and plugin for your word processor. Choose this if you are looking for a powerful, open-source citation manager. Zotero is also an excellent website bookmark service (it stores snapshots of sites too). This is the recommended option, however the group library will store a local copy on your computer, currently at 430 MB.
 - b. or just use the Zotero.org web interface to access the library content.
- 4) On the Zotero website, go to the Groups tab and search for 'AeDes'. Note the missing 's'.

- 5) Ours is the 2nd, so scroll down until you see the one that references our class:

- 6) Click on the group name, and request to join. Everybody can see the citations, but you have to be registered to join, and only after joining the group as a member can you see the full pdf files.
