13	Responder 0 (example)	Zack	I liked the jagged look from the curved glass that gives it a 3D aspect	Unpainted looks okay, doesn't look unfinished at all	Tell us more about the aesthetic. What inspired you?	Urethane could have been a cool medium to suspend the glass in, possibly easier than gluing. Scoring the glass could let you add specific shapes to the piece.

Pod Facilitator Responsibilities

- Set the presentation schedule, 4 per day. Call for volunteers, and make assignments if you don't get enough volunteers. Negotiate between pod members as needed. Your word is final.
- Record who presents, who facilitates and who attends in the Google sheet
- Request a room ASAP if your pod wants to present in-person.
- Make the technology work for hybrid sessions.
- Record the whole session to the cloud.

Critique Facilitator Responsibilities

- Read the FACILITATOR section in the Upcycle Specifications document: <https://www.aesdes.org/2023/01/26/upcycle-specifications-2023/>
- Call for the feedback stages. "Who has statements of meaning" etc.
- Help respondents rephrase neutral questions
- encourage discussion by contributing their views and soliciting input from everybody
- Keep the critiques on schedule: Presenters talk for 6 minutes, then take 5 minutes for critique, then one minute for the next speaker to get set up while others are typing comments.
- If discussions go long, suggest moving the discussion to Slack.
- Remind presenters to record their session.
- Do not present your work on the day you are facilitating.
